   What is an Interactive report?
7. What are events ? What are the events used in classical reports and interactive reports ?
   ——
8. What are basic lists and secondary lists in interactive report ? How do you pass data between the basic list and secondary lists in an interactive report?
9. How many secondary lists can be created in an interactive report?
10. What is the domain and data element in DDIC?
11. What is the structure and how is it different from a table?
12. What is data type and data objects?
13. Difference b/w if and case statement.

——

——

IBM:
- Logging in DDIC.
- Where will be the logging options.
- Line_exist & read which is better.
- Projects.
- Joins.

——

EY :
1. What are the types of enhancement?
2. Difference b/w interface , class and abstract class.

3. What is ODATA and how do you create it?
4. What are lock objects and search help?
5. **If there is one enhancement where I need to update the Purchase date, can we use a "commit work and wait" statement? - No , we can use update FM**
   a. **Different types of Function modules.**
6. How to find BADI in SAP?
7. What are CDS Views and how do we use them in HANA?
8. **If I need to update some data like SO data or PO data in db , how to do it? - Using BAPI.**

9. **In BAPI , I need to update the Data into the db, what/how can we do it? - Using update or modify keywords.**
10. What are things to be configured when creating tables in sap se11?
11. How do you auto-populate the particular field in the sm30 tcode? - Using TMG Events.
12. ***Difference b/w customer exit and user exit.*** *- Revise*
13. .What is the Remote function module?
14. What is **CL_SALV_TABLE** in SAP OOABAP?
15. What is SAP OOABAP and difference b/w normal ABAP?

16. How to add a new custom field in the table ?
                    ECC - Include or Append structure
                    HANA - Field tab is there -> we can add new field.
——

Additional field in BAPI.

Deloitte and IBM

Deloitte & Hindhuja

16. DDIC
17. Transparent table vs pooled table.
18. Control break statement.
19. Check and value table.
20. Primary and Foreign key
21. Interactive report.
22. Events used in reports.
23. Scripts.
24. Logo in sap scripts - se78
25. Smartforms questions.
26. OO ABAP vs ABAP
27. How to debug BADI?
28. How to find BADI?
29. Scenario based questions.
30. How do you find an IDoc issue without retriggering?
31. How to assign search help to the field sap?
32. Pre-requiste for FM.
33. Folder in smartforms - to prevent page break in the doc.
34. Pass value chk in RFC
35. Badi find - se18/se84
36. Customer exit - find smod

Truncate the values in smartforms

Template & table In smartforms

Why smartforms are client independent and scripts are client dependent

Enhanced point and enhanced section

BADI & BAPI.

Foreign key relationship.

Pass by value check box in FM(RFC).

Capgemini

Capgemini

1. Count the no of lines in the internal table.
   > Lines(int_tab).
   > DESCRIBE TABLE itab LINES lv_cnt.
2. Concatenate in old and new abap syntax.
   > Old Syntax : Concatenate s1 s2 into s3 sep
   > [{string_var}]
   > &&
3. Post_migration issue
4. Selection screen 2 parameter sales org and file path , based on the sales org input file path needs to be changed and this file path field is not editable..how to do - which event to do?
5. In smartforms , we will pass the table from driver program but it should be optional table
6. BADI , 10 implementation is active but need to execute my 11th active implementation first, will it possible -> Badi_sorter.
   > https://sapcodes.com/2015/11/20/classic-badi-sorting-techniquestandard-sort/
7. Explicit and implicit enhancement
8. Inline Declaration.
9. Table to check project of the customer exit - MODACT
10. CDS
11. AMDP.

Verizon

1.Idoc status after edited   - 32(out) & 69(in)
2.Sales order basic type - Orders & order05
3.Idoc status.
4.Additional field for BAPI.

Saint-Gobain

Questions:

Project - IDOC one.

How to create table in SAP?

Lock objects - real world scenarios.

Search help.

Events in ALV.

BADI.

BAPI VS BDC difference.

Session method vs Call transaction - data updates.

Two radiobutton B1 and B2 is there , two field F1 and F2..If I click R1, F2 needs to be hideen..vice versa.

MPP ..if press any key,what event will be triggered.
